Well worth checking out  
but this game is getting a lot of negative reviews for one reason  
YOU NEED HAMACHI TO PLAY TWO PLAYERS

\*\*\*\*\*Since there are no actual servers made by this small developer, it's meant for computers on the same line. Hamachi is meant to work around that\*\*\*\*\*. how to relax with your bad day  
feels good. Legit work in progress! Now that streaming has been implemented and released into the retail PlayClaw there will be much more improvements etc..

This Dev or Dev team is very active in the steam community forums and is really nice person.

Hi5 to the makers and publishers of PlayClaw and Dev team!

What to let folks know that there computer setup may effect PlayClaw Positively or Negitively so keep that in mind. If you having bad frame drops etc.. might be a bottle neck a number of things generally HD can be CPU or GPU or not enough ram etc.. do your research!

Download install and launch PlawClaw and easy to configure, to configure for twitch streaming goto your [twitch.tv/dyingjedi](https://www.twitch.tv/dyingjedi) account and then on the left when logged in click dashboard, then clisk streaming key then click the link that says reveal streaming key and attach that to the PlayClaw and your all set back out with it enabled and your closes servers and Walla your ready to stream!

Overlays are fun and going to be re-worked and your gonna have cool changes here shortly but as of this release they are useful and fully function without issues so far.

DyingJedi :d2involker:. This thing saved my bacon a great many times while I was learning how to not suck as a Wing Diver.. This game series has so much potential, but how it is setup is horrible and no fun at all. The interface screen is horrible. You can't do anything without a window popping up in your way. The tutorial is horrible with once again windows popping up in your way. Screw this mess. Go play Cities Skylines. You will get a lot of fun out of that game instead of wasting money on this crap. 1V10.

It is a great game with a lot of opportunities. The game nicely mixes mythology and history with simple but complicated farming adventure.

Anyone who plays the game should know that the game is still in early access. It will be developed well. And the bugs will surely be fixed.. Very short game. Shows promise by the developer. About 1 hour total play time.. this is the kind of visual novels i play to pretend im the protagonist and make me feel like im loved. It is an alright game. could deffinetly be more exciting. Like if things broke on the game actually show them broken. maybe have a stove fire. a bed bug infestaion. instead of just somethings broken, and theres a red light over it. I would also like to be able to interact with characters around town, and in the houses I own. They could tell me what they need. like if rent is to high, or if it is a steal. The ability to add on things to the building to bring up rent. like a new room, a pool, a backyard. Pets. If someone wants a pet they have to pay a fee. Also my landlord is so boring. Not stlish at all. I want them to wear a fancy dress. lol! I hope you make this game better because it is really bare bones to me. My roommate told me I should get into game design. He himself has worked on video games. Thank you!. That is just a very bad made Dodonpachi rip-off, where you even spoiler the existence of "hibachi" or whatever the secret is. And if it isn't enough, the music makes the game even worse. It's boring and it doesn't fit into the atmosphere of a bullethell-shooter (if it is supposed to be one). I've also tried DX-Mode. I didn't see you effort put into the hard difficulty, it's just Normal-Mode with after-death-bullets coming out of enemies.

And i have to tell you, that this is my first bad review i've ever given on steam. I am always fair and give even better reviews than the game deserves. And i'm also a big fan of Shoot' em' ups. Sorry, but this game has no effort included, and the prize for such a game is too high. It seems like i've wasted 8\u20ac here. At least I should have waited for another Steam-Sale.... Even tough not as popular like Diablo 2 or Sacred , this game also offers a good hack and slash RPG experience, there are tons of options for character customization, the story is good and can be played from many perspectives (factions), which also boosts replayabilty. Those who love the hack'n slash RPG genre should definitely give this a try.
